

Work of the University of North Texas' CyberCemetery Highlighted by National Media

The University of North Texas's (UNT) [CyberCemetery](#) was the subject of an [Associated Press article](#) last week. The CyberCemetery, a GPO partner since 1999, houses the Web sites of Federal agencies and commissions that have ceased operations. In 2006, GPO, the National Archives and Records Administration, and UNT signed an agreement that named UNT and the CyberCemetery as an affiliate archive.

Congratulations to the staff at UNT for developing and continuing to expand this important resource.

To learn more about other GPO partnerships and the partnership marketing plan, please visit the [Partnership page](#). If your depository has a project or a possible partnership idea that you would like to discuss with GPO, please complete the [partnership inquiry form](#).
